

INSTALLATION INSTRUCTIONS

Measure the dimensions of the room. Note that Bright & Up™ is recommended for lay-in tiles only.

Clean/degrease the grids before renovation tile installation*.

Wear clean gloves to keep the surface of the tile clean.

Identify the installation direction of the Bright & Up™ overlay tile based upon the location of the holes.

Lift the existing ceiling tile.

Position the Bright & Up™ ceiling overlay tile, smooth side down, directly beneath the existing tile.

Lower ceiling tile and overlay onto the grid for a fresh new look

At room edges: measure length and width at center distance **and allow 10mm more** to compensate the acceptable sagging of the overlay (5-6mm per 600mm).

Cut the ceiling overlay with a cutter or a paper cutting machine for a cleaner cut. Up to two tiles can be cut at the same time.

For lighting/ventilation/sprinkler integration, cut the ceiling overlay at the right dimensions with a cutter or appropriate cutting machine.

* If cleaning of grid is not enough, it may be beneficial to contact your paint supplier.
